

My site at Lanark is my first time in using KingDrymix mortars. You know that you are dealing with a quality supplier right from the off, from the initial site survey to the arrival of your new silo's that are in pristine condition.

The silos make life that bit easier through the advice on keeping them in tip top condition from KingDrymix service engineers and help line which I have always found available, which helps keep my site running smoothly.

The ease in which you can have them refilled is effortless and times agreed are met at all time. The over all consistency in material and service from KingDrymix has been first class and I look forward to using KingDrymix time and time again.
